

Global Container Service

Become an Investor in the storage and logistics of temperature cargo business

gcs-reefer.com

Investment

areas

We work with investors in three areas:

- Sale, rental of reefer, dry and tank containers.
- Sale, rental of diesel generators for reefer containers.
- Container terminal development.

Investment pattern

Dividends are payed every month

The minimum investment amount is the equivalent of 12000 USD.

12% per annum, with a minimum investment period of 1 year, pegged to the US dollar. You will double your investment in 8.3 years.

The percentage is much higher than in a bank today and much more profitable than an investment in commercial or residential real estate for rent.

Investment security will be ensured by the high capitalization of Global Container Service, LLC and the pledging of the company's fixed assets in the form of containers and diesel generators.

The collateral is estimated at 20% below the market price.

Today we own a fleet of 140 reefer containers and 160 diesel generators and we continue to develop actively.

Stable rental income from containers and diesel generators will ensure an uninterrupted dividend payout on the investment.

How we work:

- Choose the direction of investment.
- Determine the interest rate and investment area.
- Determine the collateral depending on the investment area.
- Conclude an agreement with notary certification.
- Pay dividends to your bank card from the 1st to the 10th day of each month.

Global Container Service

- **Global Container Service** is an official dealer of the world's leading manufacturers of reefer containers and diesel generators, such as: Carrier, Thermoking, Daikin and Starcool

Since January 2017

THERMO KING

Since October 2017

Since August 2015

Since December 2013

- The **Global Container Service** company has been operating in the market of transportation and stationary storage of temperature-controlled cargoes in reefer containers for 8 years
- We have been dynamically developing since 2013
- The development of the company is facilitated by the active growth of enterprises producing temperature cargoes both for domestic and for export markets. The main export of temperature cargoes are chicken, eggs, confectionery.
- Growth dynamics of export of temperature cargoes + 50% every year
- Containers – equipment that is always in great demand in Ukraine and the price of equipment only grows every year
- No loss in price and a constantly growing market, ensures investment safety and profitability through the sale and rental and maintenance of this equipment

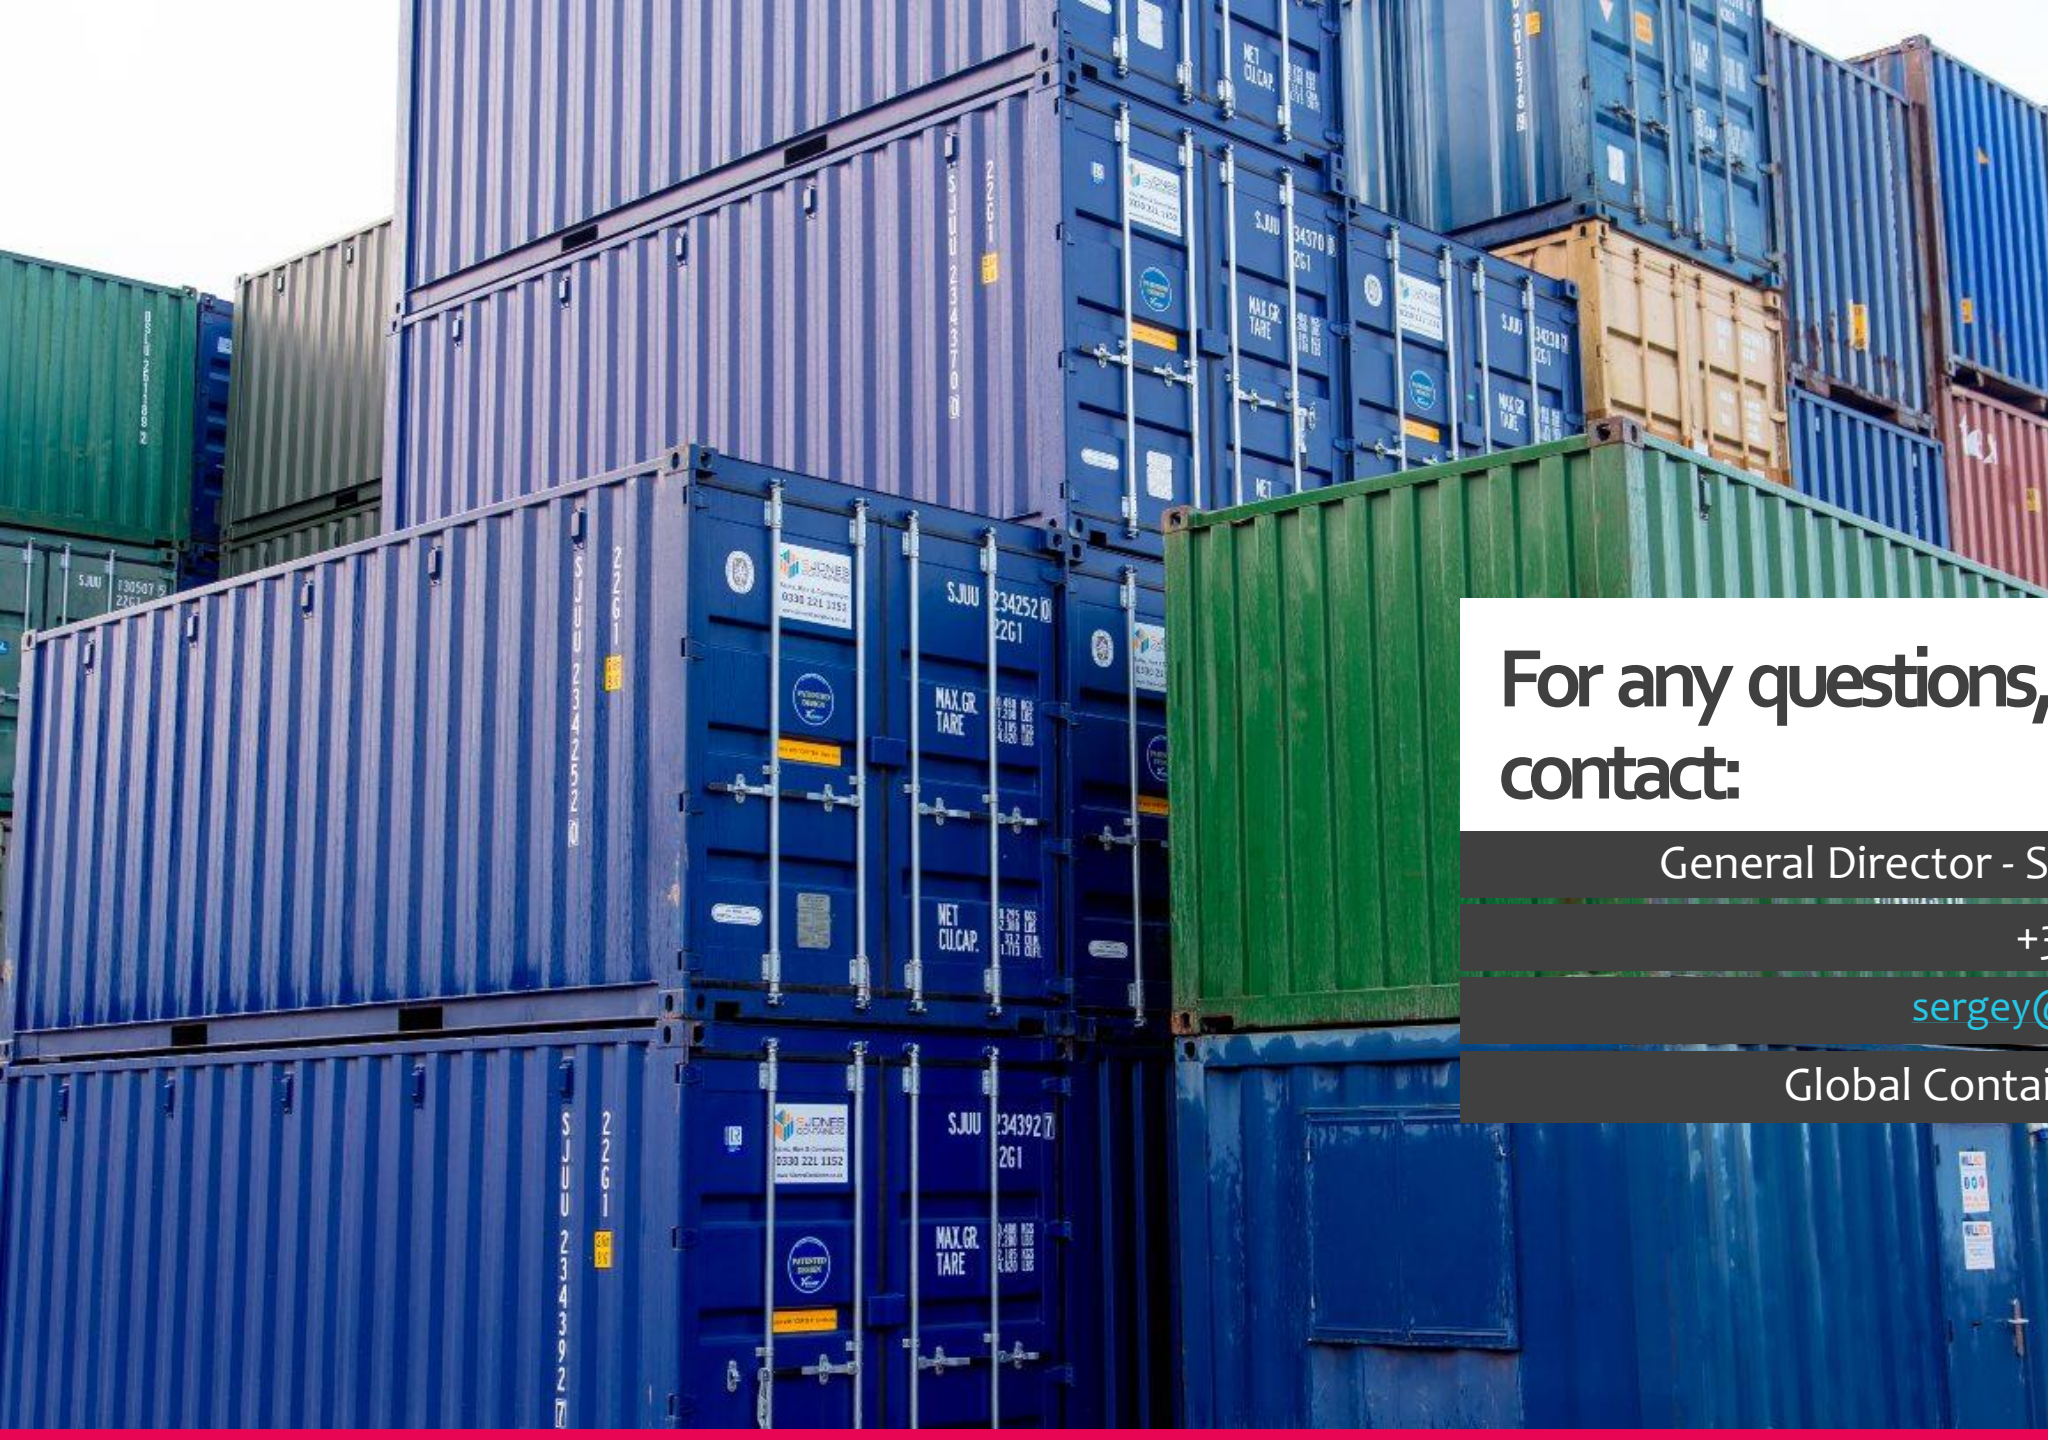

The main areas of our company:

- Sale, rental, repair, service, storage, as well as a full range of services for reefer, dry and tank containers
- Sale, rental, repair, service, storage, management, as well as a full range of services for mounted diesel generators for reefer containers
- Sale of spare parts for all types of containers and diesel generators (more than 135000 items)
- Terminal services for line, forwarding and transport companies (PTI, container storage, jenset management, hull works, preparation of containers for loading export cargoes).
- Remote monitoring of reefer containers and diesel generators.
- Training of electrical mechanics in the maintenance of reefer containers on ships for the line companies CMA-CGM and MSC.
